**Durability and protection that exceeds the 2006 UL standard.**

**P**atented SafeLock™ protection denies power if the GFCI is miswired or if the GFCI is damaged and protection is lost. This prevents the unsafe condition of power without protection. P&S has the broadest range of ground-fault protection, with the first LED Nightlight/GFCI Combination, and the first Tamper-Resistant GFCI, in addition to Auto-Ground and Illuminated versions.

For Hospital Grade GFCIs, refer to SF1102R4.

**Features & Benefits**

**SafeLock™ Protection** denies power if the GFCI is miswired or if the GFCI is damaged and protection is lost. This prevents the unsafe condition of power without protection.

**Back wire clamp** allows for fast installation of ground wires.

**Two back wire holes per termination** add wiring flexibility, eliminate pigtail and save box space.

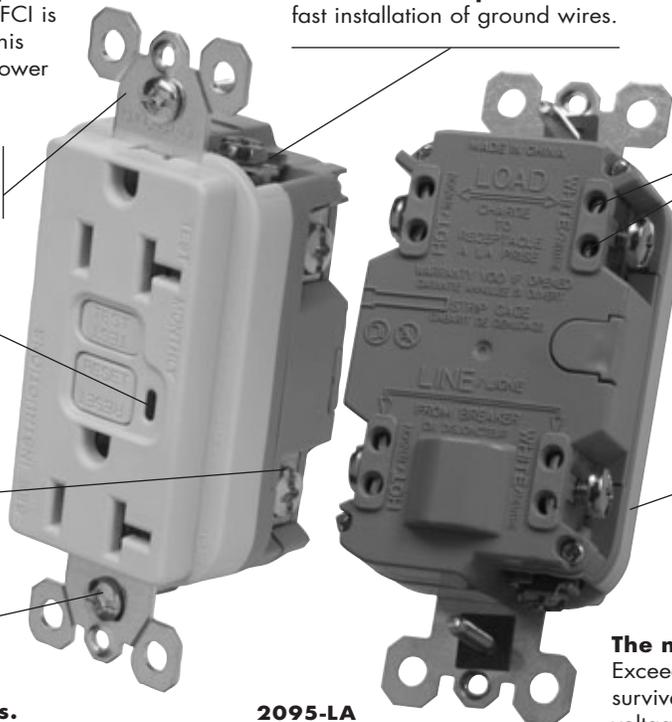

**Nickel post-plated mounting strap** for superior corrosion resistance.

**Trip indicator light** (red lamp) makes it easy to identify tripped condition.

**Side or internal screw-pressure-plate back wire termination** with #14 – #10 AWG stranded or solid, copper or copper-clad conductors.

**Captive screws** make for easier installation.

**Meets 2006 UL requirements.**

**2095-LA**

**Prevents line-load reversal miswire:** No power to the face or downstream receptacles if wired incorrectly.

**High-impact-resistant, thermoplastic construction** for superior strength and durability.

**1/4" thinner than competitors' GFCIs;** leaves more room for wires in the box.

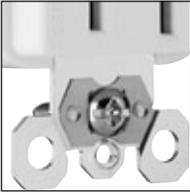

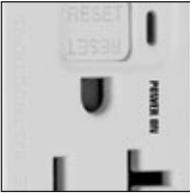

**The most durable GFCI available.** Exceeds UL943 voltage surge requirements; survives 100x the required UL 3kA/6kV voltage surge test cycles.
