

Standard Features & Accessories

All models include

- Adjustable duct cover (for 8 – 9' ceilings) is standard
- Must also purchase interior, exterior or in-line ventilator kit, sold separately (see **Installation Notes & Accessories** for recommended Viking ventilator products)
- Heat sensor turns the ventilator on full power when cooking temperatures reach uncomfortable levels
- Variable speed controls for custom venting—separate on/off switch allows you to leave ventilator at favorite/most-used setting
- 12-hour timer built into ventilator controls
- Delay feature allows you to set the ventilator to shut off on its own from 10 to 30 minutes later
- 24"D. (tests show 24"D. hoods perform properly over 27"D. ranges)
- Heavy-duty construction; sleek, contemporary design and styling
- o Virtually seamless stainless steel design with no visible screws
- Easy cleanup
 - o Dishwasher-safe, stainless steel mesh filters efficiently remove grease and heated vapors from the air, and are easily removed for quick cleaning (frame and mesh are stainless steel)
 - See **Dimensions & Specifications** table for number of filters per model
 - o Design of low-profile filter system means less interior hood space to be cleaned
 - o Canopy interior is completely lined in stainless steel for increased rigidity, seamless appearance, and easy cleaning
- 50-watt halogen lights with dimmer control
- Power switch and dimmer control are separate, allowing you to leave dimmer at favorite position
 - o See **Dimensions & Specifications** table for number of lights per model

UTILITY REQUIREMENTS

Proper installation/ducting is extremely important to ensure maximum performance. Use a qualified and trained installer.

VENTILATION

- Check with a qualified and trained installer or local codes for makeup air requirements, if any.
- Max. duct run
 - o For 300 – 1,200 CFM—50' (15.2 m)
 - o For 1,500 CFM—75' (22.9 m)
 - o Duct run length is for general reference only; always use a qualified and trained installer.

GAS

Not applicable

- o Straight runs and gradual turns are best; for example, each 90" elbow is equivalent to 5' – 10' (1.52 – 3.05 cm) of straight run.
- 7' round duct for 300 – 600 CFM; 10' for 900 – 1500 CFM
 - o Never use flexible duct; it creates back pressure/air turbulence and greatly reduces performance.

ELECTRICAL

- Hardwire direct with two-wire with ground
- 120 VAC/60 Hz
- Max. amp usage (rating includes rec. ventilator kit rating)

PLUMBING

Not applicable

Note: All CFMs are based on tests with 0.1 static pressure. Without applying static pressure (some brands do not), CFM could be greatly overstated.

* A 1,200 CFM interior- or exterior-power ventilator should be used when installed over range/rangetop with gas char-grill.

** It is recommended that the 1,500 CFM ventilator be used with longer duct runs.

Note: Maximum amp rating for hoods includes recommended ventilator kit rating. All products must be hard wired with two-wire ground. An interior- or exterior-power ventilator kit must be purchased for installation with all 18"H. hoods.

✦ Installation Notes & Accessories

Recommended Ventilator Kits

- See **Installation Requirements** table for recommendations for each hood model
- One ventilator, one duct run for any size hood/ventilator
- A 1,200 CFM interior or 1,500 CFM exterior (if applicable) ventilator should be used over ranges/rangetops with gas grill
- Must use Viking ventilator kits with Viking hoods; use of non-Viking kits voids product warranty
