QA/QC Plan Implementation

Completion

Export QA/QC data

Data file(.xls)

PDF Documents

Setup QA/QC Plan:
- Checklists
- Forms
- Workflows

Perform Inspections in field

Review and approve Inspections

Design Tools

LATISTA Field

FM Software

COBie Exchange

COBie Exchange

Data Flow Process

- COBie2 .xls file into LATISTA Field from the application interface
- LATISTA Field creates required data from COBie data:
  - Floors
  - Spaces
  - Contacts
- Users setup the QA/QC plan for the same project
- QA/QC documents are generated by LATISTA Field as result of implementing the plan
- COBie2 data is exported from LATISTA Field. Application contributes to Issue and Document tabs of .xls file. Data is exported in ZIP-archive with .xls file inspection reports.
- Copy Document and Issue tabs from the resulting .xls file and paste them into actual COBie2 .xls file.
- Save resulting .xls as XML spreadsheet and transform it into .ifc and .ifcxml using BimServices
